

WHO WE ARE

At Chameleon Cabinet Coatings, we affordably transform your cabinets within one week from start to finish with a fully functioning space during the process. We use durable coating products, all guaranteed with our three-year warranty. And you will enjoy working with our delightful team.

Our homes are meant to be a place of rest, fun, family, and peace. Adding style and special touches help create this atmosphere. Cabinetry forms the first impression when you walk into a kitchen, bathroom, or laundry room. The style, color choices, and accessories can make a huge difference in the feel of a room. A fresh, upgraded kitchen can inspire you to cook healthy, delicious meals and eat together as a family. A stylish laundry room can make the mundane chores feel invigorating and inspiring. A unique bathroom can create a special place of relaxation, privacy, and serenity.

Our family friend, Tony Cardinale, is the pioneer in the cabinet coating industry and founded a proven process and method that is like no other. He shared his business expertise with the Fisher family to bring the cabinet coating service to Pennsylvania.

WE ARE A FAMILY-OWNED BUSINESS

We are a family-owned business. John Hostetler is a friend of the Fisher family and worked at the company as an employee for years before deciding to take on Chameleon Cabinet Coatings as his own. He's a skilled painter, knowledgeable, and dependable. His family is excited to be a part of your cabinet transformation!

An unwavering commitment to construction quality, strong business ethics, and treating people the way they like to be treated, led the Fisher family to start Chameleon Cabinet Coatings and the Hostetler family to carry on the company and the rest is history!

HOW TO SCHEDULE YOUR FREE IN-HOME CABINET PAINTING QUOTE

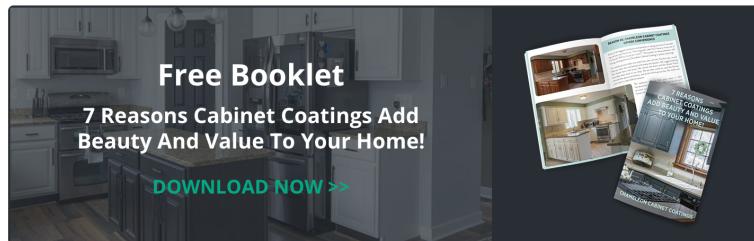

"Chameleon Cabinet Coatings just left after installing my newly painted cabinet drawers and doors. Everyone who works there is an amazing professional. The "before" pics of my cabinets are really depressing, a kind of orange-brown, full of gouges and nicks (they're around 70 years old). After the artisans at Chameleon worked their magic, the cabinets look amazing. I'm beyond thrilled. Everyone was so meticulous; upbeat; super polite; and really, really hard working. And they cleaned up as well. The best decision I ever made was calling Chameleon Cabinet Coatings. I don't think even brand-new cabinets could look this fabulous."
